The City of Marysville will be adding 5 traffic signals included in projects starting in 2020. The additional signals will improve traffic conditions around some of the more congested intersections within the City.

Anticipated Schedule

Most of these projects will begin in 2020 and be completed in 2021. This is primarily due to the time required to order the metal support poles and mast arms. The Scott Farms signal at SR 4 is dependent on the schedule of a multi-family development and so it may not begin construction until 2021 or later.

Project Funding

The City will be receiving funds from alternate funding sources shown below to help offset the City's investment toward this infrastructure.

- SR31 Improvements, Phase 2**
\$318,946 (95%) ODOT Small Cities Grant
- Scottslawn Rd Interchange**
\$350,000 (50%) 629 ODOT Development Funding
- Scott Farms @ SR4**
\$90,000 (30%) Developer Contribution
