

Sanitary Sewer Lateral Repair

What if I suspect my sewer lateral is clogged or backed up?

1. Call the City of Marysville Wastewater Department at (937) 645 - 7344. City staff will inspect the public sanitary sewer to ensure there is no blockage in the City's infrastructure.
2. Reach out to a local contractor so that they may use a camera to verify the integrity of the private sanitary sewer lateral. If the lateral is found to be damaged within the public roadway the contractor may submit a quote to perform a repair on the lateral, via email, for review and approval by the City. (ccrist@marysvilleohio.org)
3. So long as the damaged or blocked portion of the lateral is under pavement, the City will compensate the homeowner for this portion of the work. Any work done outside of the public roadway will be the responsibility of the homeowner.
4. The contractor will be responsible for obtaining a Right-of-Way permit through the City. (Application available at <https://marysvilleohio.org/>)
